Art Unit: 2833

#### **DETAILED ACTION**

# Response to Amendment

1. Applicant's amendment filed December 17, 2002 in which Claims 1, 9 and 16-17 have been amended and new Claims 26-33 have been added, has been place of record in the file as Paper No. 17.

# Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-7, 9-13, 16-17 and 26-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura (U.S. Patent No. 6,102,708) in view of Behl (U.S. Patent No. 6,104,607). With regard to Claims 1-3, 9, 16-17 and 26-33, Kimura discloses an electrical connector system comprising: an electronic card connector (1) having an opening, between (81) and (91); a frame (12) associated with the electrical connector (1) and a transition board (260). See Figs. 2-5.

Application/Control Number: 09/638,119

Art Unit: 2833

Kimura doesn't show a temperature sensor positioned to detect a temperature of a mating connector and positioned to allow insertion and removal of the mating connector from the electrical connector.

Behl discloses an electrical connector (500) having a temperature sensor (517) positioned to directly detect a surface temperature of a mating connector (510) and positioned to allow insertion and removal of the mating connector (510) from the electrical connector (500). See Figs. 6-7.

Thus, it would have been obvious to one with ordinary skill in the art to modify the electrical connector system of Kimura by including a temperature sensor positioned to directly detect a temperature of a mating connector and positioned to allow insertion and removal of the mating connector from the electrical connector as taught in Behl to detect overload and to shut down the system when overload takes place.

With regard to Claims 4-7, and 10-13, Kimura discloses the electronic card connector (1) includes a conductive cover (81,91) having an aperture, (below (86)), the cover includes a tab (86) associated with the aperture (below (86)); and further comprising an eject mechanism (351). See Fig. 1.

4. Claims 8, 14-15 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura (U.S. Patent No. 6,102,708) in view of Behl (U.S. Patent No. 6,104,607) and Cohn et al. (U.S. Patent No. 4,915,639). The combination of Kimura and Behl discloses the claimed invention except for the temperature sensor mounted to a flexible circuit.

Application/Control Number: 09/638,119

Art Unit: 2833

• Cohn et al. discloses a flexible circuit (72), the temperature sensor (70) mounted to a flexible circuit (72). See Fig. 6.

Thus, it would have been obvious to one with ordinary skill in the art to modify the electrical connector system of Kimura and Behl by including the temperature sensor mounted to a flexible circuit as taught in Cohn et al. to make the sensor easy to move inside the system in order to detect temperature of different sizes of mating connectors.

# Response to Arguments

5. Applicant's arguments with respect to claims 1-33 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edwin A. León whose telephone number is (703) 308-6253. The examiner can normally be reached on Monday - Friday 10:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (703) 308-2319. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Art Unit: 2833

• Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
